DETAILED ACTION

Drawings

1. The drawings are objected to because the circle below "Hello Received" should have a descriptive label. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

Claim Objections

3. Claim 7 is objected to because of the following informalities: "said routers" in line 1 seems to refer back to "at least two router modules" in line 1 of claim 1. If this is true, it is suggested to change "said routers" to --said router modules--. In line 3, "the corresponding state machine" seems to refer back to "respective state machines" in line 6. If this is true, it is suggested to change "the corresponding state machine" to --the respective state machine--.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "the associated neighbor router" in line 2. There is insufficient antecedent basis for this limitation in the claim. "said neighbor router" in line 2 seems to refer back to "associated neighbor router" in the same line. If this is true, it is suggested to change "the associated neighbor router when said neighbor router is created" to --an associated neighbor router when said associated neighbor router is created--.

Allowable Subject Matter

6. Claims 1-4, 6, and 8 are allowed.

Art Unit: 2616

7. Claims 5 and 7 would be allowable if rewritten or amended to overcome the objection(s) and/or the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
